

SunSource Energy

Quality Policy

28.01.2022

With a mission of enabling the Energy Transition for C&I customers, we at SunSource Energy Pvt. Ltd. are committed to develop solar power plants that are reliable, retain value and ensure customer satisfaction as per applicable quality standards.

Quality:

As a part of our business activity, we are here to deliver quality projects, in sustainable manner. The company places a high value on the continual improvement of quality management system in the delivery of services.

To accomplish all the above, we are taking following measures:

- Continual improvement via periodic audits, create a culture of problem solving and actively applying lessons learnt.
- Ensuring proper communication of quality documents & policy to employees, contractors and all other interested parties who works with us or on behalf of us.
- Periodic site visits to ensure the project outputs meet acceptance criteria defined during quality planning.
- Utilizing quality control techniques like audits, material inspection, technical due diligence, vendor assessment, applying right quality assurance plan etc.
- Performance evaluation & periodically reviews of Quality Management System.
- Employing the right people with critical skills enables the company to execute our strategy.
- Providing training to new employees, adhering to latest technology and feedback of the customers.
- Comply to all legal regulatory guidelines & applicable standards across all states & countries where we work.
